SUMMARY

Full-Stack Developer with **2+ years of hands-on development experience** building MERN-based and real-time web applications. Built **3+ full-stack projects** featuring real-time collaboration, **4-level RBAC**, AI integrations, authentication, and cloud services. Experienced in developing secure, scalable applications using modern JavaScript technologies.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C++, SQL, HTML, CSS

Frontend: React.js, Next.js, Redux Toolkit, Zustand, Tailwind CSS, Shadcn/UI

Backend: Node.js, Express.js, MongoDB, Redis, Authentication & Authorization, Socket.io

Tools & devops: Docker, Git, GitHub Actions, CI/CD, Postman

PROJECTS

CodeSync 🗄 | BetterAuth, Yjs, Socket.IO, Zustand, Node.js Mar 2026

- Engineered a real-time collaborative coding platform supporting **3+ concurrent users** with conflict-free editing using **Yjs CRDTs**.
- Enabled real-time synchronization across **4+ collaborative features**, including code editing, file updates, user presence, and cursor tracking.
- Created an AI coding assistant for code explanations, debugging support, and contextual suggestions through real-time interactions.
- Architected a browser-based IDE with **multi-file project management**, Monaco Editor, authentication, and collaborative workspace functionality.

Storely 🗄 | MongoDB, Express.js, React.js, Node.js, Redux Toolkit Nov 2025

- Developed a cloud storage platform with **10 MB file upload support**, cloud-based storage, and secure file management.
- Established **4-level RBAC** with Owner, Admin, User, and Viewer roles for fine-grained resource permissions.
- Designed an administrative dashboard covering **3+ management areas**, including user monitoring, access control, and platform administration.
- Secured user onboarding through **OAuth authentication** and session-based authorization across protected user and admin routes.

Orbit AI 🗄 | Next.js, Socket.IO, Turborepo, Groq, Redis Mar 2026

- Launched a real-time communication platform supporting **1-to-1 and group conversations** using **Socket.IO**.
- Facilitated **2 communication modes** with real-time messaging, user activity updates, and collaborative interactions.
- Leveraged Redis for real-time backend services and session-related operations to support concurrent communication.
- Powered conversational AI features with **Groq APIs** for summaries, contextual recommendations, and real-time assistance.

OPEN SOURCE CONTRIBUTIONS

EaseMotion | GitHub

- Contributed **8 merged pull requests** with new features, improvements, and bug fixes.
- Collaborated through GitHub issues and pull requests while following existing project standards.

QuoteVote | GitHub

- Debugged a **login authentication bug** and proposed a fix by tracing the existing authentication flow.

CERTIFICATIONS

- ReactJS & Redux - Udemy
- Python for Data Science - XIE
- NodeJS with Express & MongoDB - Udemy
- Command Line in Linux - Coursera
- SQL

EDUCATION

Indira Gandhi National Open University
Bachelor's in Computer Applications

Aug 2024 – Aug 2027
Delhi, India
